

Protema DL03709 PRO70 servers

Protema lift used to service servers

Internet serves as a major customer channel for many companies. Therefore, internet hosting and application management is a rapidly growing segment offering services such as portals, online publications, streaming services, search engines and e-commerce solutions. This demands many servers which are all kept in environments as shown in the photos above. The Protema PRO70 comes in handy for service and maintenance purposes.

Project supervisor:
Lars Thim, TAWI AB Sweden
Project number: DL03709
Project engineer:
David Lorensen, TAWI AB
Lifting: Electronic computer servers
Used with: PRO70
Max capacity, this version:
